CAAS(AW)95 - Issue 3

USER / INSTALLER RESPONSIBILITIES

- NOTE:
- 1. It is important to understand that the existence of the Certificate alone does not automatically constitute authority to install the part/component/assembly.
 - 2. Where the user/installer works in accordance with the national regulations of an Airworthiness Authority different from the Civil Aviation Authority of Singapore (CAAS), it is essential that the user/installer ensures that his/her Airworthiness Authority accepts parts/components/assemblies from the CAAS.
 - 3. Statements 13a and 14a do not constitute installation certification. In all cases, the aircraft maintenance record must contain an installation certification issued in accordance with the national regulations by the user/installer before the aircraft may be flown.
